Hi Kristine,

With the greatest due respect to those 6 teachers, based on the amount of feedback that I, and I am sure you, have received, something went wrong with their interpretation of the standard, and it is clearly not in line with the understanding that the Level 2 exam team has, or what is specifically stated in the standard.

Please note, I am by no means happy with this response, and I know a number of other teachers are likely to feel the same.

Kind Regards,
Jake Wills
